the MIS for the Voluntry Sector

the MIS for the Voluntry Sector

e-vol is a web-based management information, activity monitoring and reporting system, designed specifically to meet the needs of the voluntary sector. Originally conceived and developed as a solution for a large project in Wales, e-vol has gained considerable interest from other voluntary bodies.

about e-vol

e-vol in a nutshell

A platform for delivering consistent information, best practice reporting and auditing channels across the sector, e-vol provides organisations, supervisory bodies and agencies with a set of valuable and effective Contact Relationship Management, Interaction Logging, Grouping, Project, Reporting, and Membership Management tools - each designed to help you in your

day-to-day role. And, because e-vol is a web-based resource, your staff can access the records they need when they need them, regardless of their location - all they need is a computer, a web browser and an Internet connection. The system is robust and easy to use, but full support and training is provided (including the supply of User Manuals).

e-vol benefits

Using e-vol will benefit your organisation and your users.

The system will benefit your organisation by:

- Delivering consistent information, best practice reporting & auditing channels
- Putting procedures in place to ensure quality of service
- Providing a real-time, single source of authority
- Allowing you to manage memberships and notify that renewal is due
- Centralising contact records

The system will benefit your users by:

- Putting the information they need at their fingertips
- Giving them powerful tools to perform and manage tasks
- Providing them with pre-formatted templates for emails & correspondence
- Allowing them to interact with contacts without leaving the system
- Making their lives easier and increasing efficiency

“Membership management was a huge task for me before we got the system – now it only takes me a few minutes each week”

Performing Tasks with e-vol

e-vol lets you:

- Keep accurate and up-to-date records of individual contact and organisation details
- Handle contacts either as individuals or associate them to any number of organisations
- Enable the efficient production of a variety of required output reports for internal/external monitoring and informational/publicity materials
- Manage Memberships and send out Renewal Notifications

implementing and supporting e-vol

e-vol has been designed to meet the implementation and support challenges that face the voluntary sector. Challenges include:

- 1. Varying degrees of network infrastructure**
- 2. The technical ability of your staff**
- 3. Lack of dedicated IT departments**

The system addresses these challenges by:

1. Having low infrastructure requirements.

The system will run on your existing office PCs or laptops. You only need an internet connection and a web browser to log into the system.

2. No obstacles to adoption.

Your organisation doesn't require any additional hardware, personnel or specialist knowledge to run the system. Staff can be up & running quickly as the system is easy to use.

3. Full training and support is provided.

We provide you with comprehensive user training, including manuals, and ongoing system support.

“e-vol has the capability to allow organisations that don't even use a computer at the moment to move to a paperless office in one step”

Transform Your Organisation

implementing and supporting e-vol

If you're interested in seeing how e-vol can transform your organisation, simply apply for an online demonstration. Fill in the form on the web site and we'll send you passwords to our full working demo and you can try the system for yourself.

If you need guidance through the demo, or you'd like to talk to us about your requirements and get a quote, then simply tick the box asking for help and assistance.

**It's time to transform your organisation.
Apply for your demo today.**

“Since we've started using the system, I can run all our monthly reports in less than half an hour.”
